Dear Candidate,

Congratulations on being shortlisted for the next stage of our AI Engineer hiring process.

As part of the Round 1 technical evaluation, we would like you to complete a practical assignment:
"Build an Enterprise Knowledge Assistant".

This assignment is designed to evaluate your ability to build a production-oriented AI application using modern AI engineering practices, including Retrieval Augmented Generation (RAG), document processing, LLM integration, system design, and software engineering skills.

Assignment Overview

You are required to build an AI-powered knowledge assistant that can answer user questions based on a given set of enterprise documents.

The solution should demonstrate:

- Document ingestion and processing
- Knowledge indexing and retrieval
- LLM-based response generation
- Source citation
- User interaction interface
- Engineering best practices

Assignment Details

Please find the complete assignment document attached to this mail.

Submission Requirements

Please submit the following:

- **Source Code Repository**
 - GitHub/GitLab repository link
 - Include setup instructions and dependencies
- **Demo Video (Maximum 5 minutes)**
 - Application walkthrough
 - Sample queries and responses
 - Brief explanation of your approach
- **Solution Documentation**
 - Architecture overview
 - Technology choices
 - Design decisions
 - Evaluation approach
 - Limitations and future improvements
- **Submission Form**

Please complete the submission form after uploading your solution:

<https://forms.gle/gcmJnZUDXjx51JuA7>

Timeline

Assignment Released:

26th June 2026, 5 PM IST

Submission Deadline:

29th June 2026, 5 PM IST

Total Duration: 72 Hours

Late submissions may not be considered for evaluation.

Evaluation Criteria

Your submission will be evaluated on:

- AI/RAG system design
- Answer accuracy and relevance
- Engineering quality
- Scalability considerations
- Documentation quality
- Problem-solving approach

We encourage you to focus on building a robust and well-designed solution rather than adding unnecessary complexity.

Important Guidelines

- Please ensure your submission is your own work.
- Do not share API keys or confidential credentials.
- Clearly mention any assumptions or external tools used.
- You are free to choose your preferred technology stack.

We look forward to reviewing your solution and learning about your approach to AI engineering.

All the best!

Best regards,
Rakshitha
